BLUE BIRD
ALL-ELECTRIC
Blue Bird was first to market electric school buses in 1994. With advances in battery technology, Blue Bird can now offer efficient and affordable electric-powered buses. The reliable drivetrain systems offered in our Blue Bird Vision and All American RE buses follow the long-standing tradition of Blue Bird quality.

There are **hundreds of thousands** in grant incentives for electric school buses, which could help to make purchase acquisition more affordable.

Blue Bird’s electric buses produce **Zero Emissions, which means cleaner air for our children.**

Our Electric buses have excellent **temperature control**, delivering great performance in many weather conditions.

Go Further with **up to 120 miles** in a single charge. Buses can be charged overnight, obtaining a **full charge in approximately 8 hours**.

**Low Maintenance Costs** - less parts means less maintenance. Because there is no need for engine oil changes, and no transmission or engine to maintain. Blue Bird’s electric buses have a lower cost of maintenance than traditional, combustion-fueled buses.

---

**All American RE Electric**

Charge Time: approximately 8 Hours  
GVWR: up to 36,200 lbs  
Capacity: up to 84 Passengers  
Range: up to 120 Miles

---

**Vision Electric**

Charge Time: approximately 8 Hours  
GVWR: up to 33,000 lbs  
Capacity: up to 77 Passengers  
Range: up to 120 Miles

Total Cost of Ownership

Vehicle-to-Grid (V2G) Technology

Blue Bird’s Vision and All American Electric school buses will offer the option of vehicle-to-grid, or V2G technology. V2G creates opportunities for energy companies to “buy back” stored energy that the buses are holding after a charge as well as charge at off peak times when power is less expensive. This is a valuable tool for peak-season consumption times, as well as during natural disasters when energy needs are greater than usual. V2G provides school districts and companies an additional opportunity to lower their Total Cost of Ownership.

Long Term Savings

Because there is no need for engine oil changes, and no transmission or engine to maintain, Blue Bird’s electric buses have a lower cost of maintenance than a traditional, combustion-fueled bus.

Contact your Local Dealer for more information on our electric bus offerings!
As a pioneer and leader in alternative fuel vehicles, Blue Bird was first to market electric school buses in 1994. With advances in battery technology, we can now offer efficient and affordable electric-powered buses. The proven, reliable drivetrain system in the Vision and All American RE Electric follows the longstanding tradition of Blue Bird quality.

BLUE BIRD
Vision & All American Electric Buses

Zero Emissions
Our Vision and All American Electric buses produce zero emissions, making them an excellent choice for improving air quality.

Go Further
Travel up to 120 miles on a single charge

Low Maintenance Costs
Less parts means less maintenance

Zero Emissions
No emissions means cleaner air for our children

Temperature Control
Excellent performance in many weather conditions

Less Parts Equals Less Maintenance
Our electric buses are not run on a traditional engine and transmission powertrain. In fact, they have no transmission at all! Less parts means less maintenance costs for your fleet.

DC to AC Inverter
The drive motor’s maximum torque and power is obtained at very low RPMs giving the bus the ability to accelerate at a greater rate than other fuel types. Valuable charging time is saved since the drive motor is not running while the vehicle is stopped.

TM4 Motor
Charging Infrastructure

Our Electric buses are currently designed to use any Level 2 charging cable. The popular HSC-50P 40 amp charging station, which is built to fit most electric vehicle charging needs, makes charging our buses an option at most charging stations around your city.

Visit:

www.afdc.energy.gov

or scan the QR code for more information and locations of level 2 charging stations near you.
A Powerful Partnership

Blue Bird is pleased with the new partnership for electrified power solutions with Cummins. Cummins has invested in and acquired capabilities around fully electric and hybrid solutions, as well as the critical components that provide the largest impact on performance and quality. The extensive network of warranty and service work that Cummins provides further strengthens the Blue Bird electric offering.
